JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject Index of Volume 465

Absorption
Discussion on permeation transients in terms of insertion reaction mechanism and kinetics, 37
Admittance
Electropolymerization of methacrylonitrile and *N*-vinyl-2-pyrrolidone as probed by an EQCM, 200
Adsorption
A minimum separating diffusion and adsorption waves in polarography using a static mercury drop electrode, 30
A sodium-specific condensed film of α-cyclodextrin at the mercury | water interface, 51
X-ray absorption in relation to valency of iridium in sputtered iridium oxide films, 88
α- and β-$[PW_{12}O_{40}]^{3-}$
Synthesis, characterisation and voltammetric study of a β-Keggin-type $[PW_{12}O_{40}]^{3-}$ complex, 129
Anthraquinones
Anthraquinones as mediators for the indirect cathodic reduction of dispersed organic dyestuffs, 80
Electrochemical study of self-assembled monolayers of a β-cyclodextrin methyl sulfide covalently linked to anthraquinone, 209
Atomic force microscopy
Tin electrodeposition on carbon electrodes. From nuclei to microcrystallites, 63
Au electrode
In situ STM study of self-assembled mercaptopropionic acid monolayers for electrochemical detection of dopamine, 72
Autocatalytic (electroless) deposition
Cyclic voltammetry and quartz crystal microgravimetry study of autocatalytic copper(II) reduction by cobalt(II) in ethylenediamine solutions, 142

Butler–Volmer kinetics
Integration analysis of the cyclic voltammograms of the electrode reaction in a diffusionless system, 219

Carbon monoxide
Origin of the infrared reflectance increase produced by the adsorption of CO on particulate metals deposited on moderately reflecting substrates, 234
Cathode
Theory for water management in membranes for polymer electrolyte fuel cells: Part 2. The effect of impurity ions at the cathode side on the membrane performances, 18
Cercosporin phytotoxin
A study of the bielectronic electro-reduction of cercosporin phytotoxin in highly acidic non-aqueous medium, 225
Chemically modified electrode
Electrocatalytic oxidation of hydrazine at a chlorogenic acid (CGA) modified glassy carbon electrode, 168
Chlorogenic acid
Electrocatalytic oxidation of hydrazine at a chlorogenic acid (CGA) modified glassy carbon electrode, 168
Chronoamperometry
Electrocatalytic oxidation of hydrazine at a chlorogenic acid (CGA) modified glassy carbon electrode, 168
Cobalt(II)
Cyclic voltammetry and quartz crystal microgravimetry study of autocatalytic copper(II) reduction by cobalt(II) in ethylenediamine solutions, 142
Codeposition
Electrodeposited $PbO_2 + RuO_2$: a composite anode for oxygen evolution from sulphuric acid solution, 160
Copper determination
Rapidly renewable and reproducible electropolymerized surface at a monomer modified carbon paste electrode, 102
Copper(II)
Cyclic voltammetry and quartz crystal microgravimetry study of autocatalytic copper(II) reduction by cobalt(II) in ethylenediamine solutions, 142
Crystallites
Tin electrodeposition on carbon electrodes. From nuclei to microcrystallites, 63
Cyclic voltammetry
Anthraquinones as mediators for the indirect cathodic reduction of dispersed organic dyestuffs, 80
Electrocatalytic oxidation of hydrazine at a chlorogenic acid (CGA) modified glassy carbon electrode, 168
Cyclic voltammogram
Integration analysis of the cyclic voltammograms of the electrode reaction in a diffusionless system, 219
α-Cyclodextrin
A sodium-specific condensed film of α-cyclodextrin at the mercury | water interface, 51
Cyclodextrins
Electrochemical study of self-assembled monolayers of a β-cyclodextrin methyl sulfide covalently linked to anthraquinone, 209
Cytochrome *c*
The role of the potential distribution at the electrode interface in determining the electron transfer rate constant, 96

Diaphorase
Electrochemical evaluation of the reaction rate between methyl viologen mediator and diaphorase enzyme for the electrocatalytic reduction of NAD^+ and digital simulation for its voltammetric responses, 153
Dicationic nickel complex
Enhanced electrostatic interactions for selective and controllable permeation of ionic species at a monolayer of self-assembled dicationic nickel complex, 177
Diffusion
A minimum separating diffusion and adsorption waves in polarography using a static mercury drop electrode, 30
Diffusionless system
Integration analysis of the cyclic voltammograms of the electrode reaction in a diffusionless system, 219

PII: S0022-0728(99)00139-4

Digital simulation
Electrochemical evaluation of the reaction rate between methyl viologen mediator and diaphorase enzyme for the electrocatalytic reduction of NAD^+ and digital simulation for its voltammetric responses, 153
Dopamine
In situ STM study of self-assembled mercaptopropionic acid monolayers for electrochemical detection of dopamine, 72
Dropping mercury electrode
A minimum separating diffusion and adsorption waves in polarography using a static mercury drop electrode, 30

Electrocatalysis
Electrocatalytic oxidation of hydrazine at a chlorogenic acid (CGA) modified glassy carbon electrode, 168
Electrodeposited $PbO_2 + RuO_2$: a composite anode for oxygen evolution from sulphuric acid solution, 160
Small signal (local) analysis of electrocatalytic reaction. Pole-zero approach, 119
Electrochemical impedance
The role of the potential distribution at the electrode interface in determining the electron transfer rate constant, 96
Electrochemical quartz crystal microbalance (EQCM)
Electropolymerization of methacrylonitrile and *N*-vinyl-2-pyrrolidone as probed by an EQCM, 200
Electrodeposition
Tin electrodeposition on carbon electrodes. From nuclei to microcrystallites, 63
Electrode reaction
Enhanced electrostatic interactions for selective and controllable permeation of ionic species at a monolayer of self-assembled dicationic nickel complex, 177
Electron transfer
Electrochemical study of self-assembled monolayers of a β-cyclodextrin methyl sulfide covalently linked to anthraquinone, 209
The role of the potential distribution at the electrode interface in determining the electron transfer rate constant, 96
Electropolymerization
Electropolymerization of methacrylonitrile and *N*-vinyl-2-pyrrolidone as probed by an EQCM, 200
Rapidly renewable and reproducible electropolymerized surface at a monomer modified carbon paste electrode, 102
Electroreduction
A study of the bielectronic electro-reduction of cercosporin phytotoxin in highly acidic non-aqueous medium, 225
Electroreflectance
The role of the potential distribution at the electrode interface in determining the electron transfer rate constant, 96
Electrosorption
Small signal (local) analysis of electrocatalytic reaction. Pole-zero approach, 119
Enzyme catalysis
Electrochemical evaluation of the reaction rate between methyl viologen mediator and diaphorase enzyme for the electrocatalytic reduction of NAD^+ and digital simulation for its voltammetric responses, 153
EQCM
Cyclic voltammetry and quartz crystal microgravimetry study of autocatalytic copper(II) reduction by cobalt(II) in ethylenediamine solutions, 142
Ethylenediamine
Cyclic voltammetry and quartz crystal microgravimetry study of autocatalytic copper(II) reduction by cobalt(II) in ethylenediamine solutions, 142

FT-SERS
In-situ monitoring of the interaction of lactate dehydrogenase with NAD on a gold electrode by FT-SERS, 187

Glassy carbon
Origin of the infrared reflectance increase produced by the adsorption of CO on particulate metals deposited on moderately reflecting substrates, 234
Gold electrode
In-situ monitoring of the interaction of lactate dehydrogenase with NAD on a gold electrode by FT-SERS, 187
Grafting
Electropolymerization of methacrylonitrile and *N*-vinyl-2-pyrrolidone as probed by an EQCM, 200

Heteropolyoxometalates
Synthesis, characterisation and voltammetric study of a β-Keggin-type $[PW_{12}O_{40}]^{3-}$ complex, 129
Hydrazine oxidation
Electrocatalytic oxidation of hydrazine at a chlorogenic acid (CGA) modified glassy carbon electrode, 168
Hydrogen
Discussion on permeation transients in terms of insertion reaction mechanism and kinetics, 37

Immittance
Small signal (local) analysis of electrocatalytic reaction. Pole-zero approach, 119
Impedance
Small signal (local) analysis of electrocatalytic reaction. Pole-zero approach, 119
Impurity ions
Theory for water management in membranes for polymer electrolyte fuel cells: Part 1. The effect of impurity ions at the anode side on the membrane performances, 1
Theory for water management in membranes for polymer electrolyte fuel cells: Part 2. The effect of impurity ions at the cathode side on the membrane performances, 18
Indirect reduction
Anthraquinones as mediators for the indirect cathodic reduction of dispersed organic dyestuffs, 80
Infrared reflectance
Origin of the infrared reflectance increase produced by the adsorption of CO on particulate metals deposited on moderately reflecting substrates, 234
Insertion
Discussion on permeation transients in terms of insertion reaction mechanism and kinetics, 37
Integration analysis
Integration analysis of the cyclic voltammograms of the electrode reaction in a diffusionless system, 219
Interface
A sodium-specific condensed film of α-cyclodextrin at the mercury | water interface, 51
Interface potential
The role of the potential distribution at the electrode interface in determining the electron transfer rate constant, 96
Interferometry
Second harmonic generation investigation of rhodamine B derivatives in Langmuir–Blodgett films, 195
Iridium
Origin of the infrared reflectance increase produced by the adsorption of CO on particulate metals deposited on moderately reflecting substrates, 234

Kinetic models
Small signal (local) analysis of electrocatalytic reaction. Pole-zero approach, 119

Lactate dehydrogenase
In-situ monitoring of the interaction of lactate dehydrogenase with NAD on a gold electrode by FT-SERS, 187
Langmuir–Blodgett films
Second harmonic generation investigation of rhodamine B derivatives in Langmuir–Blodgett films, 195
Linear analysis
Small signal (local) analysis of electrocatalytic reaction. Pole-zero approach, 119

Membrane
Theory for water management in membranes for polymer electrolyte fuel cells: Part 1. The effect of impurity ions at the anode side on the membrane performances, 1
Theory for water management in membranes for polymer electrolyte fuel cells: Part 2. The effect of impurity ions at the cathode side on the membrane performances, 18
Mercaptopropionic acid
In situ STM study of self-assembled mercaptopropionic acid monolayers for electrochemical detection of dopamine, 72
Methacrylonitrile
Electropolymerization of methacrylonitrile and *N*-vinyl-2-pyrrolidone as probed by an EQCM, 200
2-methyl-8-hydroxyquinoline
Rapidly renewable and reproducible electropolymerized surface at a monomer modified carbon paste electrode, 102
Molecular orientation
Second harmonic generation investigation of rhodamine B derivatives in Langmuir–Blodgett films, 195
Monolayer
Enhanced electrostatic interactions for selective and controllable permeation of ionic species at a monolayer of self-assembled dicationic nickel complex, 177
Monomer modified carbon paste
Rapidly renewable and reproducible electropolymerized surface at a monomer modified carbon paste electrode, 102

NAD^+
Electrochemical evaluation of the reaction rate between methyl viologen mediator and diaphorase enzyme for the electrocatalytic reduction of NAD^+ and digital simulation for its voltammetric responses, 153
NAD
In-situ monitoring of the interaction of lactate dehydrogenase with NAD on a gold electrode by FT-SERS, 187
NADH
Electrochemical evaluation of the reaction rate between methyl viologen mediator and diaphorase enzyme for the electrocatalytic reduction of NAD^+ and digital simulation for its voltammetric responses, 153
Nucleation
Tin electrodeposition on carbon electrodes. From nuclei to microcrystallites, 63
N-vinyl-2-pyrrolidone
Electropolymerization of methacrylonitrile and *N*-vinyl-2-pyrrolidone as probed by an EQCM, 200

Oxide-matrix composite
Electrodeposited $PbO_2 + RuO_2$: a composite anode for oxygen evolution from sulphuric acid solution, 160
Oxides
Electrodeposited $PbO_2 + RuO_2$: a composite anode for oxygen evolution from sulphuric acid solution, 160

Permeation
Discussion on permeation transients in terms of insertion reaction mechanism and kinetics, 37
Point of zero charge
Electrochemical features of zirconia polymorphs. The interplay between structure and surface OH species, 136
Polarography
A minimum separating diffusion and adsorption waves in polarography using a static mercury drop electrode, 30
Polymer electrolyte fuel cell
Theory for water management in membranes for polymer electrolyte fuel cells: Part 1. The effect of impurity ions at the anode side on the membrane performances, 1
Theory for water management in membranes for polymer electrolyte fuel cells: Part 2. The effect of impurity ions at the cathode side on the membrane performances, 18
Polymer modified electrode
Rapidly renewable and reproducible electropolymerized surface at a monomer modified carbon paste electrode, 102
Proton insertion
X-ray absorption in relation to valency of iridium in sputtered iridium oxide films, 88

Rate constant
Electrochemical evaluation of the reaction rate between methyl viologen mediator and diaphorase enzyme for the electrocatalytic reduction of NAD^+ and digital simulation for its voltammetric responses, 153
Rhodamine B derivative
Second harmonic generation investigation of rhodamine B derivatives in Langmuir–Blodgett films, 195
Rotating disk electrode
Electrocatalytic oxidation of hydrazine at a chlorogenic acid (CGA) modified glassy carbon electrode, 168

Scanning electron microscopy
Tin electrodeposition on carbon electrodes. From nuclei to microcrystallites, 63
Scanning tunnelling microscopy
In situ STM study of self-assembled mercaptopropionic acid monolayers for electrochemical detection of dopamine, 72
Second harmonic generation
Second harmonic generation investigation of rhodamine B derivatives in Langmuir–Blodgett films, 195
Self-assembly
Electrochemical study of self-assembled monolayers of a β-cyclodextrin methyl sulfide covalently linked to anthraquinone, 209
In situ STM study of self-assembled mercaptopropionic acid monolayers for electrochemical detection of dopamine, 72
Spectroelectrochemistry
Anthraquinones as mediators for the indirect cathodic reduction of dispersed organic dyestuffs, 80
Sputtered iridium oxide films
X-ray absorption in relation to valency of iridium in sputtered iridium oxide films, 88
Surface state
Electrochemical features of zirconia polymorphs. The interplay between structure and surface OH species, 136

Tin
Tin electrodeposition on carbon electrodes. From nuclei to microcrystallites, 63
Transport equations
Theory for water management in membranes for polymer electrolyte fuel cells: Part 1. The effect of impurity ions at the anode side on the membrane performances, 1
Theory for water management in membranes for polymer electrolyte fuel cells: Part 2. The effect of impurity ions at the cathode side on the membrane performances, 18

Vat dyes
Anthraquinones as mediators for the indirect cathodic reduction of dispersed organic dyestuffs, 80
Voltammetry
Electropolymerization of methacrylonitrile and *N*-vinyl-2-pyrrolidone as probed by an EQCM, 200
Synthesis, characterisation and voltammetric study of a β-Keggin-type $[PW_{12}O_{40}]^{3-}$ complex, 129

Water electrolysis
Electrodeposited $PbO_2 + RuO_2$: a composite anode for oxygen evolution from sulphuric acid solution, 160
Water management
Theory for water management in membranes for polymer electrolyte fuel cells: Part 1. The effect of impurity ions at the anode side on the membrane performances, 1
Theory for water management in membranes for polymer electrolyte fuel cells: Part 2. The effect of impurity ions at the cathode side on the membrane performances, 18

Zirconia
Electrochemical features of zirconia polymorphs. The interplay between structure and surface OH species, 136
